Harmonization of Human Development Programme and Donors in Papua Province

January 2007

A cooperation between UNDP, the local Government and multi stakeholders in Papua.

Foreword

May peace be to us all,

People-centered Development in Papua which related to the achievements of Millennium Development Goals (MDGs) get full support from government, private sectors, Civil Society Organizations, and donors community in Papua.

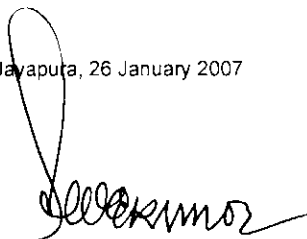

Planning of development programs that will be conducted by government and external assistances or donors in the future need an increasing understanding on lessons learned from the existing or planned activities. Accordingly, close coordination between all Papua development stakeholders, including donors and local actors are very important to improve the activities harmonization and effective distribution of development impacts.

Related to above-mentioned purposes, BAPPEDA as government agency who responsible to plan and control the development conducts mapping of donors activities in Papua to ensure the harmonization and synchronization of program implementation in Papua. Mapping of donors activities also prevent overlaps of activities and location for program implementation.

This is the third edition booklet and contains new information on international agencies or organizations who work in Papua. Expectantly, the compilation in this booklet will give new inputs to the development actors in Papua. This booklet will be updated and published regularly so all development actors would get new and up to date information, continuously.

We thank all the agencies and organizations who have participated in Papua development. Hopefully that with close cooperation we can achieve the development goal to improve the welfare of all communities in Papua.

Jayapura, 26 January 2007

Dr. Ir. Abraham Werimon, M.Ed

Head of BAPPEDA – Papua Province
