<p>Project Title:</p> <p><i>Papua Rural Electrification Pilot Program</i></p>	<p>Implementing Partner (Office address, phone number, fax, email and name of the representative):</p>  <p>Multi Donor Support Office for Eastern Indonesia Jl. Dr. Soetomo No. 26, Makassar 90113, Sulawesi Selatan Tel.: 0411-3650320-23 / Fax. 0411-322049 Email: info@bakti.org</p> <p>Liaison Office in Papua: Gedung BPID Papua, Jl. Sam Ratulangi No. 32 Jayapura</p>
<p>Funding (Amount of the budget and funding source/donors):</p> <p>Funding agency: Dutch Trust Fund</p>	<p>Counterparty (Local government partner):</p> <p>Pegunungan Bintang government</p>
<p>Project Description (The aim and the activities):</p> <p>The goal of the program is to develop a model to provide power supply for communities who live in rural area. The power supply must be environmental friendly and can be sustained by the communities. The limited services area of State Electricity Enterprise leads to the high dependency of rural communities to the diesel power plant. But the cost of diesel power plant is too expensive because the transportation cost is high and the oil prices keep increasing. On the other hand, electricity is one of basic needs. Communities need the electricity for their daily and economic activities.</p> <p>This program tries to explore the possibility to use water power plant at the villages in remote areas. The water power plant will be managed by the communities together with the local government.</p> <p>The result of these activities can be used to convince other parties that the application of efficient technology together with community capacity improvement can be implemented in remote areas.</p>	

This program is initiated by Pegunungan Bintang government (Regent and BP3D) and supported by Multidonor Support Office for Eastern Indonesia.

<p>Funding (Amount of the budget and funding source/donors):</p> <p>Special Autonomy Funds Other personal donations</p>	<p>Counterparty (Local government partner):</p> <p>Village Community Empowerment Agency Social Welfare Department</p>
<p>Project Description (The aim and the activities):</p> <p>The main goal of the community development program is to empower and develop local communities so they can achieve a better standard of living. The strategies to develop local community are through the usage of local languages in the transfer of new knowledge and skills, improvement of community health and education quality, income generating, and construction of transportation infrastructures.</p> <p>SIL has language teams that are working together with local communities in local community development.</p> <p>The community development activities encompass a wide range of aspects, including health, education, and infrastructure. The activities include:</p> <ul style="list-style-type: none"> • Health: <ul style="list-style-type: none"> ○ Health services to local community. ○ Medicine supply. ○ Health information dissemination (nutrition, sanitation, hygiene, HIV/AIDS etc). ○ Care and support for the children with cerebral dysfunction. ○ Conduct workshops ○ Assist the local communities with clean water projects and ferrous-cement water tanks. • Education: <ul style="list-style-type: none"> ○ Build classrooms. ○ In some cases, provide housing for children from various language groups so they may continue their studies. ○ Vocational training: fishery, husbandry, agriculture, computers, etc. • Infrastructure <ul style="list-style-type: none"> ○ Build bridge (in Langda and Bomela) ○ Build airstrips in Dao and other pioneer locations 	

- Others:
 - Facilitate capacity building workshops
 - Provide information in various community development training and workshops for local partner organizations.
 - Transfer technology to national community development workers in SIL.
 - Conduct leadership workshops.
 - Conduct language related workshops.
 - Training and assistance to Mother Tongue Translators.

Distrik (Kecamatan)		
Kampung / Desa		

- All SIL locations in Papua such as:
- Boven Digoel Regency: Kouh, Waropko and Mandobo District.
 - Yahukimo Regency: Langda and Bomela District.
 - Nabire Regency: Siriwo District
 - Mappi Regency: Obaa District

- Plan, methods and mechanism of the implementation:**
- Equip the facilitators with community development principles and other skills that are needed to work together with community.
 - Conduct research on local languages and promote the use of local languages.
 - Train local people with new skills and introduce new appropriate technologies.
 - Dissemination of health information to the community and try to eliminate local superstitions regarding health problems. Community in certain villages believes that sickness comes from magic spell of others.
 - Provide additional support for community development program, such as distribute seedlings, build dormitories, build airstrips etc.
 - Provide basic service such as health services.
 - Work with local government in various health issues.
 - We usually start with small and limited programs, such as literacy and translation that can involve participation from local communities. We then train community cadres/volunteers for each program. This is the way to sustain the programs and raise the self-determination of local community.

Lessons learn and progress of the project:

- Vocational training fully supports the participants in their work. The courses are designed so that the participants who come from various areas in Papua even with different backgrounds and levels of education still able to take part in the courses at the same time.
- Transfer of technology in every workshop using simple Indonesian also in simple ways of teaching making it possible to be understood by providing interaction with the participants from the various isolated locations.
- Local community in Kampung Manggelum (Kouh District) contributed to the half of the airstrip building cost. Their participation shows their sense of belonging, and their awareness to develop their own community.
- Project with Awyu group (live in Mappi Regency) is a little more complex compared to other projects in Papua. This is due to the fact that majorities of the people in this area do not have a concept of living as a community. Short term programs are not effective for this community therefore we try to implement a long term programs.
- After we held the health workshop in Awyu group village, we received a positive response towards prevention of skin diseases. Number of people with skin diseases has decreased as many have been treated now. The village people have slowly changed their point of view, and are seeing the living as a community and are now working towards what is important for the community as a whole and are learning to help one another.
- The people of Awyu are strongly influenced by the sandalwood business, therefore they do not want to do anything without being paid even if it is for the good of themselves and the community. As of yet this is one of the hardest challenges that we are faced with.
- Challenges faced in supporting the development of the Auye people is the lack of education, this is also caused by the vast area which is almost impossible to be reach. As a solution, we have given various literacy training to the Auye as they are illiterate.
- Another challenge is transportation to remote areas. To reach remote area, we can only use chartered small plane which are not cheap. We use the air service of MAF to reach remote areas.
- Funds from the government for the people are important. But the involvement of the local communities in developing their communities also plays a very important role.

Harmonization of support to People-centered Development

<p>Project Title:</p> <p>Indigenous People's Capacity Mapping and Awareness Initiative</p>	<p>Implementing Partner (Office address, phone number, fax, email and name of the representative):</p> <p>Yayasan Pengembangan Masyarakat Desa Papua Jalan Jeruk Nipis No.117 Kotaraja-Jayapura, P.O. Box 1114, Jayapura Telp: (0967) 581071; Fax: (0967) 581778 E-mail: ypmd@jayapura.wasantara.net.id</p>
<p>Funding (Amount of the budget and funding source/donors):</p> <p>Rp. 1,184,649,375 DSF-Trust Fund, Dutch Government</p>	<p>Counterparty (Local government partner):</p> <p>This program is a direct joint program of YPMD and the Papua community, and facilitated by Yayasan Pengembangan Masyarakat Desa (YPMD).</p>
<p>Project Description (The aim and the activities):</p> <p>Objectives: This initiative seeks to document and promote indigenous peoples capacity to manage their own natural resources and develop mutually beneficial partnerships with government and other stakeholders. The initiative seeks to achieve the following objectives:</p> <ol style="list-style-type: none"> 1. Enhance the knowledge and skills of indigenous people to create an indigenous people's profile that illustrates various capacities through written documents. Enhance the skills of indigenous people to collect and analyse the aforementioned data for the development of their communities. 2. Through the experiences obtained from the mapping and documentation process, strengthen the role and function of the clan in developing partnerships with various stakeholders particularly by promoting planning and decision making roles for indigenous peoples in development programs. 3. Through advocacy based on the capacity mapping documents, strengthen the process of decentralization to the <i>kampung</i> level without relinquishing the social structure and culture of indigenous people. 4. Provide government, non-government organizations, and international organizations information about the capacity of clans in Papua in order to form collaborative programs utilizing the strengths exhibited by indigenous people in Papua. 	

Outputs:

The initiative will achieve the following outputs:

1. List of participating clan members in the capacity mapping initiative
2. List of participating NGOs in the capacity mapping initiative
3. Training materials for methodology and research instrument workshop
4. "Socialization" material and macro data for 21 different clans
5. Field research schedule and detailed map of locations
6. Anthropological data from 21 different clans in 7 cultural regions of Papua compiled and analysed in final capacity mapping report

Outcomes:

1. Reference study with a general picture of the clans/indigenous people that served as the target groups for the capacity mapping initiative. This study will be a contribution to literature regarding indigenous people of Papua that can be further developed and expanded.
2. Map of *adat* structure that provides an explanation of the structure of *adat* including complicated relationships and definitions such as *suku*, *clan*, *marga*, and *fam*. This map will illustrate the position of the clan, as the smallest grouping and core of the *adat* structure with the authority over natural resources and land.
3. NGOs involved in the indigenous peoples capacity mapping, in addition to better understanding the functions and role of the clan in the *adat* structure, also can aid in promoting the capacities and potential of indigenous people.
4. The criteria and instrument used for the mapping and promotion of the capacity of Papuan clans will be used as a reference for further mapping activities. The aforementioned tools illustrate the techniques used to identify and document local capacity. These materials encourage indigenous peoples to do further self studies and use them to promote the capacity of indigenous people for the local development.
5. The results and analysis of the mapping and promotion of indigenous peoples capacity becomes a source of information for future development projects that position indigenous peoples as agents of development. Partnerships between indigenous peoples/clans and other stakeholders will be developed based on the recommendations and analysis of the field work.
6. The results and analysis of the mapping and promotion of indigenous peoples capacity becomes a source of information for future development projects that position indigenous peoples as agents of development. Partnerships between indigenous peoples/clans and other stakeholders will be developed based on the recommendations and analysis of the field work.

<p>Mapping of Indigenous People Capacity in Papua to be addressed to about 21 clans within 7 cultural regions, i.e.: Tabi, Teluk Saireri, Doberay, Bomberay, La Pago, Me Pago dan Ha Anim. Clans to participate in this program to be decided in the coordination meeting.</p>			
<p>Plan, methods and mechanism of the implementation:</p> <p>The implementation of the program to be carried out by YPMD based on the concept note and proposal which have been proposed. Detailed time schedule and explanation of program components to be prepared by YPMD.</p>			
<p>Lessons learned and progress of the project:</p> <p>From various processes and approaches happened so far, there have been low participation and initiatives from people's side. On the other hand, there is no access to decision making for the intended time frame of the people. The behaviour that appears is instant attitude from most of the people who want everything in such as an easy way, and for that they may make sacrifice to their resources by selling their traditional land rights, or some others only have to wait government grants through technical departments that have prepared programs every year for community acting like Santa Claus.</p> <p>In order to overcome this dependency situation, this program actually wants to provide expertise and skills related to institutional aspect in which people redefine themselves vividly through people's accurate database profile that can be updated annually. Therefore, a new approach is needed through community empowerment focusing on role and initiative of community to plan and utilize natural potency owned by the community independently and sustainably for the partnership with Government and other stakeholders more humanly.</p>

<p>Plan, methods and mechanism of the implementation:</p> <p>Researches, workshops and seminars to prepare new appropriate concepts for the specific condition of Papua.</p>																
<p>Lessons learn and progress of the project:</p> <p>Project activities have been started since 2006 and will be ended when KDP finish. There are so many lessons learned from the implementation of this project that will be useful for all stakeholders who work in community empowerment programs in Papua. The most valuable lesson is that programs in Papua can not be designed in top down way. Good understanding of the specific conditions of Papua will help the planners to design programs that would give greater benefits to the communities in Papua.</p> <p>There is also a need to record all lessons learned from the implementation of KDP, and also lessons learned from other community empowerment programs. This documentation can help Papua government to conduct a better planning.</p>																

Harmonization of support to People-centered Development

Project Information Sheet

LIP 1-7-004

Contributed by UNDP-PDP

<p>Project Title:</p> <p>People-centered Development Programme - (Strengthening Government and CSOs Capacities in Planning, Implementing and Monitoring Human Development/MDGs)</p>	<p>Implementing Partner (Office address, phone number, fax, email and name of the representative):</p> <ul style="list-style-type: none"> - Provincial Level Advisory Boards in Papua Province and West Irianjaya Province. - BAPPEDA of Papua Province and West Irianjaya Province
<p>Funding (Amount of the budget and funding source/donors):</p> <p>Approximately 23,870,202 USD (for 2006-2010). UNDP and other donor countries.</p>	<p>Counterparty (Local government partner):</p> <p>National Planning Agency (BAPPENAS) and UNDP (and other UN agencies).</p>
<p>Project Description (The aim and the activities):</p> <p>This programme of support to develop government and civil society capacities to achieve the MDGs has been formulated based on a participatory assessment of needs, and through a process of multi-stakeholder dialogue in Papua and IJB, focusing on the local government and people's priorities of health, education and community livelihoods. The People-centered Development Programme sets out a structure within which multiple stakeholders can collaborate in strengthening local capacities of strategic importance for Papua and West Irian Jaya(IJB), namely:</p> <ol style="list-style-type: none"> 1) Pro-poor policy development and operational planning; 2) Locally-effective delivery of basic services; 3) Monitoring and evaluation of poverty reduction programmes; and 4) Coordination of donor support. <p>The People-centered Development Programme entails a range of activities under components relating to these four areas, to support the aim of strengthening local capacities of key agencies related to the MDGs. The programme adds value to existing and planned initiatives by improving coordination, creating opportunities for cross-actor learning, partnerships and trust building, It is intended as a five year programme of support, through which further collaborative programmes will be developed to ensure more effective and sustained development assistance to the Papua and West Irian Jaya region.</p>

Villages (Kampung)	± 120	± 20											
<p>Plan, methods and mechanism of the implementation:</p> <p>One advisor from each component will assist government and communities' key institutions to plan their MDGs program. Bappeda will serve as the coordinator of programs in the region and monitor the progress of programs implementation. BPMD will manage the assistance/pendampingan component at District or Village/Kampung level. Annual work plan will be prepared by implementing partners, and approved by Provincial level Advisory Boards. Advisory Boards will actively participating in monitoring and evaluation of program achievements. UNDP will be the manager of the trust fund and pay directly to the vendors. Provincial and regency government through RESPEK programs will allocate the Otsus fund for basic services delivery. The program expectantly will be expanding (after one or two years) if provincial and regency governments allocate more Otsus fund and donors support additional funding for the achievement of MDGs.</p>													

Lessons learn and progress of the project:

People-centered Development Programme has been starting since 1 July 2006. The inception phase started from July to December 2006.

In the inception phase, the structures and implementing procedures was set up. Series of trainings and assistances also have been conducted. Provincial Bappeda was trained on the preparation of Long Term Development Plan or RPJP based on Synthesis of Papua Needs Assessment and, Medium Term Development Plan or RPJM based on new governor's vision and mission. Assistances were given to Regencies Bappeda (Boven Digoel, Mimika, Jayawijaya, Yahukimo, Sarmi, Yapen Waropen, Raja Ampat and Fak-fak Regency) in preparation of RPJM, strategic plan by sector, district support, and fiscal decentralization strategies.

Based on the result of Papua Needs Assessment, it can be conclude that there are needs for continuous and long term assistance to develop Papua and IJB based on best practices from previous approach, and based on approaches that eliminate dependencies. The capacities of local stakeholders need to be strengthen and the partnership between local government and CSOs, especially religious institutions who have wide networks and capacity to support the communities, need to be established.

Kampung / Desa	Presently Papasena I and II, Kwerba, Kai (aim to expand program to more villages in region)															

Plan, methods and mechanism of the implementation:

We will achieve our aims through participative multistakeholder landscape assessments (used as the basis for spatial planning at the village level for conservation, maintenance of livelihoods and development), biological research to highlight and identify areas of conservation priority, and Sustainable Options Use Planning to encourage economic development through the sustainable management of natural resources.

Lessons learn and progress of the project:

Working for conservation with communities takes time and long programs are a requirement to achieve lasting results. Partnerships are essential – primarily with the communities themselves, but also finding synergy and support for the local government to achieve mutual aims is a must. Conservation in Papua must therefore be adaptive and flexible to the needs communities, government and the natural resources themselves. To find “space” in order to do this conservation must happen on the landscape scale, and fortunately in Papua there is still opportunities to do this and we are optimistic that large scale conservation can happen if given the continued support from Local and Provincial government we are receiving at present.

4-0 Integrated Infrastructure Development

Harmonization of support to People-centered Development
